Process with AI

🎯 Learning Objectives

- To provide a foundational understanding of Artificial Intelligence (AI) technology.
- To explain the key components essential for AI's functionality: algorithms, data, and computing power.
- To differentiate between various types and capabilities of AI, including Narrow AI, General AI, and Super AI.
- To introduce different AI learning methods such as machine learning and deep learning.
- To describe various functionalities of AI, with a focus on Expert Systems, Predictive AI, and Generative AI.
- To highlight the impact and potential applications of AI within the Travel & Tourism sector.
- To raise awareness about challenges like the global digital divide and the AI skills gap.
- To familiarize readers with essential AI terminology.
